3. Installation

• Desktop installation

• Rack Installation

---

4. Configuration

First, the device is powered on, the Internet is connected to the WAN port of the Gateway, the othe LAN port of the Gateway is connected to the PoE Switch, then the PC is connected to the Switch. Ensure that the PC and the Gateway are in the same subnet.

Internet
Gateway
WAN
LAN
Cloud Switch
AP   PC
Ethernet Cable

• Log in to the switch locally

Let the Switch obtain an IP address and then check the DHCP server to see which IP address was assigned.
The Switch is set to DHCP by default, so it will try to automatically obtain an IP address. If that fails, then it will use the default fallback **IP address, 192.168.0.1**

To log in, follow these steps:
1. Launch your web browser. Type the appropriate IP address in the address field.
2. The login screen will appear. **Enter admin in the Username and Password fields.**
Login in

• Cloud login switch configuration

1. Log in to the cloud management interface
(No account, you need to register an account to log in. The URL is: http://cloud2.wireless-tek.com)

---

2. Enter the cloud binding switch
(explain: The switch must be connected to the Internet to bind successfully)

Please enter the device serial number to bind a device to the current group, device can be off when binding.

Explanation: The 17-digit SN code of the switch is shown on the sticker on the back of the switch as shown in the figure below

---

3. After binding, you can use the Switch in the Tunnel option in the cloud management, and then choose to use EWEBor TELNET to enter the switch. The default account is admin and the password is admin.
(After entering the switch, you can configure it based on your own needs)
